

MALFINI PREMIUM®

In each detail

When it comes to exclusive clothes, there's no place for compromise. That's why our Malfini Premium brand reflects the latest trends, excellent quality plays first fiddle and unique natural materials are the basis. It's only in this way that we'll interest you, the most demanding customers. You'll combine premium outfits for Urban fashion, office or for entertainment precisely according to your taste. For instance, in vivid colours, current shades or timeless neutral tones.

If you rank among those who like exceptional natural fibres, SUPIMA® cotton will be the right choice for you. This variety is cultivated in mere 1% of the land from the total area where cotton is produced. It has got twice longer and stronger fibres than ordinary kinds, so it is extremely resilient and soft. Premium merino wool is a similar case. The sheep out of which this premium fibre originates live in a clean mountain setting, which lends a unique character to their fine wool.

All the clothes from Malfini Premium brand will win your favour with their quality and modern look. Malfini Premium brand products have been designed in a duo concept. You can easily adapt it with printing or embroidery to your company or club. You can give members of your team and business partners pleasure in wearing outstanding materials, while strengthening the value of your brand.

 1:1 rib knit collar with a contrast stripe
 narrow placket with 5 buttons in the shell fabric colour
 slits in side seams with a contrast tape
 inner neckline with a contrast tape
 fixing shoulder seams
 cotton treated by mercerization

MERCERIZED COTTON

The process of mercerization consists of immersing the cotton yarn into a bath for the purpose of changing their sections and leveling uneven fibers. The fiber cross-section thus obtains an almost perfect shape. The final material becomes smoother shinier and softer. Merceration results in higher strength and better color stability of the material.

MERINO

Characteristics

Merino wool is world renowned for its soft, yet firm feel, offering advantages in every area over common wool and many other fibers. The reason for these qualities is the size of an individual fiber – and merino wool fibers are very fine, thinner than 18 microns. As such, it is used in every area of fashion from haute couture robes to highly functional garments.

This natural wool is sheered from the Merino breed of sheep, kept in natural environment (open field), with most of the production comes from Australia, New Zealand and Argentina. Because sheep don't stop growing wool, they need to be sheered every year. Not only is wool a renewable resource, it is also biologically degradable – after you throw it out, it will decompose and provide soil with nutrients.

HOW TO TAKE CARE OF IT

You can use washing machine up to 40°C temperature, making maintenance easy. Of course, we recommend washing inside out and with similar colours. To preserve the shape, avoid drying in direct sunlight and heat, and iron using only steam at medium temperature. If your merino clothing catches a slight odor, just airing it properly should be enough to remove it.

BREATHABLE

Wool fibers can absorb a lot of moisture and lead it away from the body, and merino wool is even better at it.

THERMO REGULATING

Unlike synthetic materials, merino fiber is active and reacts to changes in body temperature. It retains heat when the weather is cold, and cools the skin when it's hot.

ODOR RESISTANT

Merino wool has antibacterial effects and absorbs sweat. Clothes from it stay nice and fresh much longer, even in rougher conditions.

NATURALLY ELASTIC

Each fiber works like a small "spring", expanding and contracting back into shape. The fabric, as a result, doesn't wrinkle.

PLEASANT TO WEAR

The fine, flexible fibers of merino wool make it very comfortable overall. It is soft to the touch, pleasant to wear even directly on skin, unlike most other types of wool.

MERINO RISE 157

T-shirt Men's

Single Jersey, 100 % merino wool

BAMBOO FIBER

Fiber made of bamboo based on regenerated cellulose. It has thermoregulatory, antibacterial, antimycotic and antistatic properties. Bamboo fiber is stronger along with three times higher absorbency than cotton, resistant to frequent washing and keeps its properties for a long time. We do not recommend using fabric softener in order not to reduce absorbency of the material.
